Safety first
安全第一

儿童在游戏活动中是极易受到伤害的弱势群体，在儿童游乐场地改造设计中必须把安全问题放在首位。儿童游戏活动场地的选址应避免车行道的干扰，远离环境杂乱、人员复杂及流动性大的公共活动场地，同时和周边场地要密切联系‘避免视觉死角’减少车辆、犯罪等危险因素的存在。同时，在场地改造过程中注意场地细部设计及游戏器械的安全性，加强管理和维护，避免出现钉子和螺栓等对儿童造成的意外伤害。

Children are extremely vulnerable groups in gaming activities, and safety issues must be given top priority in the design of children's playground renovation. The site selection of children's playground should avoid the interference of roadway and be far away from the public playground with disordered environment, complex personnel and high mobility. At the same time, it should be closely linked with the surrounding venues to 'avoid blind spots' to reduce the presence of vehicles, crime and other dangerous factors. Meanwhile, in the process of venue renovation, attention should be paid to the detailed design of the venue and the safety of game equipment, and management and maintenance should be strengthened to avoid accidental injuries to children caused by nails and bolts.

材料 Materials

在游乐场设施设计中，所选材料应方便耐用、卫生和易于维护。

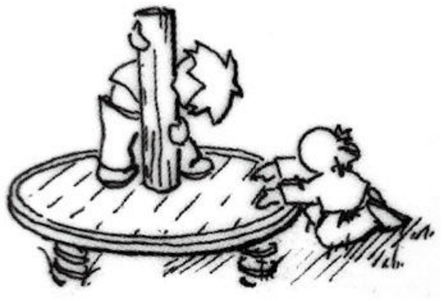

To build an amusement park, the selected materials should be convenient, durable, hygienic, and easy to maintain.

首先，既不要用潜在的有毒元素，也不要用原料金属。金属应刷漆，镀锌或以其他方式处理防止生锈。如果选择合成材料，他们也必须足够坚固耐用，以避免分裂和开裂。粗糙或不均匀材料的表面处理也是另一个考虑因素，在处理时，要避免减少儿童受伤的可能性。

Firstly, neither use potentially toxic elements nor raw metals. Metals should be painted, galvanized, or otherwise treated to prevent rusting. If synthetic materials are chosen, they must also be sturdy and durable enough to avoid splitting and cracking. The surface treatment of rough or uneven materials is also another consideration, and it is important to avoid reducing the likelihood of injury to children during treatment.

木头不应该分裂和断开。

材料不应该带有有毒元素。

Children oriented
儿童为本

儿童游乐场地规划设计既要满足儿童游戏需求，也要根据儿童身体状况特征、心理特性和公园环境条件而定。儿童的活动尺度、身心特征与成人有所不同，因此其活动空间及游戏设施的布置应以服务儿童为宗旨，充分尊重儿童的个性，遵循儿童的自主性，开发儿童在活动中的创造性，同时处理好活动的挑战性与安全性、私密空间与公共空间、动态空间与静态空间之间的关系，创造良好的儿童活动场所。在改造设计中，要注重儿童在游戏活动中走动、奔跑、攀登及爬行时的目光视线和身体尺度 . 增加以儿童活动尺度为标准的服务设施。

The planning and design of children's playgrounds should not only meet their gaming needs, but also be determined based on their physical and psychological characteristics, as well as the park's environmental conditions. The scale and physical and mental characteristics of children's activities are different from those of adults. Therefore, the layout of their activity space and game facilities should be aimed at serving children, fully respecting their individuality, following children's autonomy, developing children's creativity in activities, and handling the relationship between the challenge and safety of activities, private space and public space, dynamic space and static space, to create a good place for children's activities. In the renovation design, attention should be paid to the visual and physical dimensions of children when walking, running, climbing, and crawling in game activities. Service facilities should be added based on the standards of children's activities.

Terrain and solution
因地制宜

儿童游戏场地并不一定是一马平川、完完全全的平地，充分利用儿童游乐场地的现有地形、植物和基础设施，并对其加以完善。在条件允许下，可以利用地形以及其他构筑物创造出新奇的儿童游戏空间。除了秋千、跷跷板、滑滑梯等传统上的游乐设施，也可以在地形利用的基础上，采用旧轮胎、滚筒之类的器具作为儿童游戏的器械，既降低了游戏场地的造价，也可以充分发挥儿童的创造力和想象力。

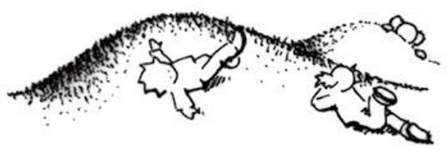

Children's playgrounds may not necessarily be flat and complete, making full use of the existing terrain, plants, and infrastructure of children's playgrounds and improving them. If conditions permit, novel children's play spaces can be created using terrain and other structures. In addition to traditional amusement facilities such as swings, seesaws, and slides, it is also possible to use equipment such as old tires and rollers as children's gaming equipment on the basis of terrain utilization. This not only reduces the cost of the game venue, but also fully unleashes children's creativity and imagination.

场地：在游乐场设计中，首要考虑因素就是场地的结构。如果能够有现成的自然地形可用，我们就可以大大地提高和简化设计。

Venue: In the design of amusement parks, the primary consideration is the structure of the venue. If we can have ready-made natural terrain available, we can greatly improve and simplify the design.

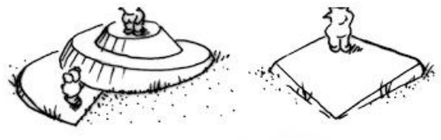

儿童对于不规则形状的兴趣远远高于有规则的形状；所以我们可以充分利用一些自然的不规则的形状，便可以事半功倍地引起孩子们的兴趣。

Children's interest in irregular shapes is much higher than that of regular shapes; So we can make full use of some natural irregular shapes, which can easily arouse children's interest with half the effort.

我们在设计的时候，如果可利用的自然环境很少，那我们可以在后期加进小山、滑道、洞穴等种种能引起儿童玩耍兴趣的设施，鼓励他们探索环境，增强他们各方面的能力。

When designing, if there are few natural environments available, we can add various facilities such as hills, slides, caves, etc. that can arouse children's interest in playing in the later stages, encouraging them to explore the environment and enhancing their abilities in all aspects.

加长和曲线形状比中规中矩的线条更受儿童喜爱。

Lengthened and curved shapes are more popular among children than regular lines.

Man and nature
人与自然结合

充分发掘人与自然的关系，让儿童在与父母他人交流的同时与自然对话，感受空气、土地、植物等，融于自然.让孩童在对外界的感觉感应和领悟中自我体验，在生命与自然的感知中自我成长。

Fully explore the relationship between humans and nature, allowing children to interact with nature while communicating with their parents and others, feeling the air, land, plants, etc., and integrating them into nature. Allow children to experience themselves through sensing and understanding the outside world, and grow through their perception of life and nature.

与周围环境交融

Blending with the surrounding environment

我们可以拿异常的地形做实验。充分利用水平面的变化，增强和减弱坡度，并且在不同的高度建立不同的区域。儿童喜欢想象型的冒险活动，像是迷路了，然后找到他们的方位；从斜坡上滚下；在高低起伏的山地间或群山中捉迷藏等。

We can conduct experiments on abnormal terrain. Make full use of changes in the horizontal plane to enhance and weaken slopes, and establish different areas at different heights. Children enjoy imaginative adventure activities, such as getting lost and finding their direction; Rolling down a slope; Playing hide and seek among the undulating mountains or among the mountains.

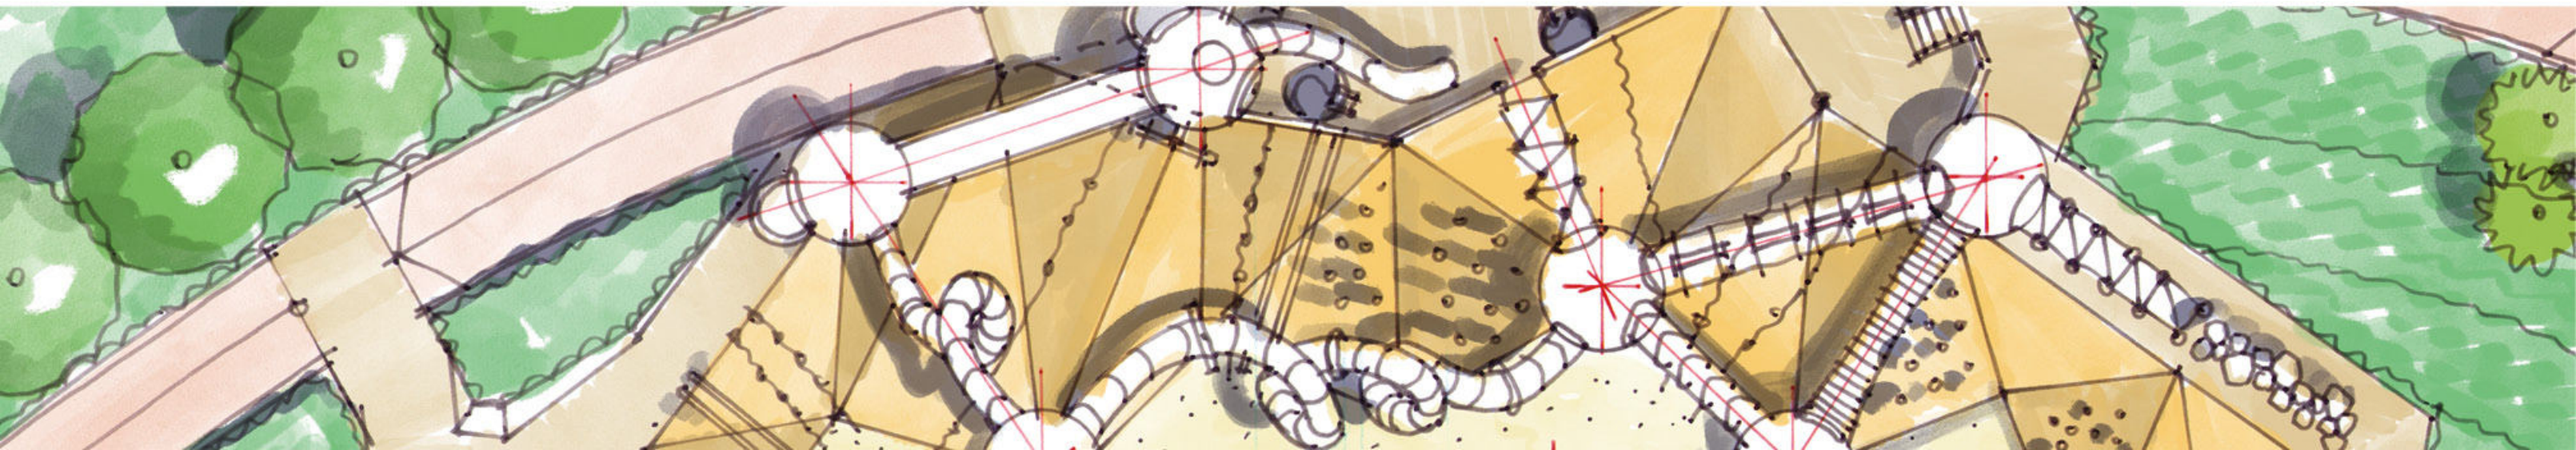

密集的树木在冬天提供阳光，在夏天提供阴凉。

Dense trees provide sunlight in winter and shade in summer.

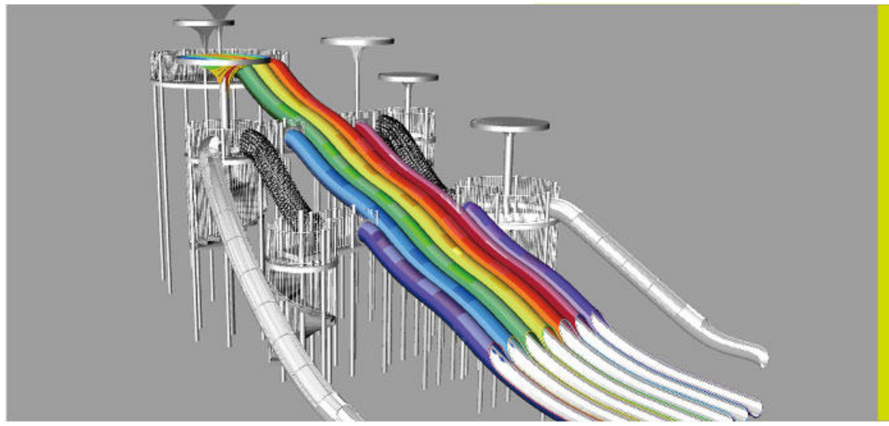

水生生态系统为儿童了解自然提供丰富的资源。

Aquatic ecosystem provides rich resources for children to understand nature.

“逆反”往往是一个青春期孩子自我意识形成过程中，有关渴望独立的呐喊，而独立又是孩子建立自我价值感和责任心的基础。我们不能只视孩子个头高了，模样变了才是长大，更需要给予并认同孩子心里上成长的权利和空间，对孩子试图靠自己努力作出的独立行为给予接纳和支持，尊重孩子做为人的尊严、价值和唯一性。

The “psychological rebellion” is children’s deep desire for independence during their development of self awareness, while independence is the basic to build children’s sense of self-worth and self responsibility. We cannot only recognize our children to grow through their physical changes, but we have to give them more support and acceptance for their psychological growth and all the endeavors they made in order to be independent. We should respect children’s self-esteem, value and uniqueness.

看似简单的一套游乐设施，其设计的内涵，需要大量的科技数据支撑。几个台阶能让达到热身效果？绳网的孔需要多大，既安全，又能制造一定挑战，让孩子们勇于尝试？这些，都是我们研究的内容。

Though the recreation facility looks simple, the content of the design is supported by a great amount of scientific data. How many steps can help people achieve the warm-up effect？ How big should the hole of the nets in order to meet the safety requirements while at the same time keep it challenging to childern? These are for us to research.

小朋友有时候会冒险地去玩，我们不要担心，要相信小朋友有自我保护意识。但我们要做的是，在设计中排除不安全因素。

Don’t worry abour the kids when they are on their adventrues. They have their own self-protection awareness. What we actually need to do is to exclude all the unsafe factors from our design.
